Take a closer look at your fleet with **TRACKER Reporter**

INTRODUCTION

Being able to access information that will enable you to make informed decisions is vital.

The beauty of TRACKER Reports is that such information is available to you 24 hours a day simply by accessing our website or via mobile phone. Using a combination of satellite GPS (Global Positioning System) and GSM mobile phone technology, TRACKER Reporter automatically reports real time information at defined time intervals.

This information will make a huge difference to everyday decision making and the rewards will become apparent immediately.

The knowledge that you will be provided with will enable you to make better choices and save money both in the short term by identifying inefficiencies, and in the long term by giving you the insight to improve the way your business works.

The format of the reports you'll receive is designed to be clear and easy to read so you'll know exactly what you're looking at and as these reports can be sent daily, or weekly, they'll save you time in other ways too – doing the payroll and job costing will be so much easier. To make the reports really user friendly, we can add customer names and locations to the database for you,

or you can do this yourself if you'd rather. This will make it easy for you to recognise at a glance journeys that are made on a regular basis.

When using the internet, an individual secure internet site will give you full access to your fleet information, meaning you can get up to date reports from any PC equipped with an internet browser, wherever you are.

No areas are left to chance; reports include Time Sheets, Address Travel, Travel, Travel Cost and Fleet Utilisation. These help you, amongst other things, to confirm compliance with Working Time Directives, calculate the cost of completing a job, optimise your fleets activity and size and be confident of call verification.

To benefit from this information, simply fit a TRACKER Reporter unit in each of your vehicles. It's easy to install, easy to use and makes the process of fleet management easier to monitor and manage. All in all, it's the sort of information that you really can't afford to be without.

TRAVEL Report

Description

The Travel Reports combine data collected automatically on start, stop, location and mileage into a report detailing journeys taken over a specified period. For special applications, where deliveries may be made without stopping the engine, the user can elect to count an idling condition as a stop.

Simply click here on each journey to open Activity Report for individual journey analysis.

Typical Use

- Validating individual journeys
- Identifying private mileage in working hours
- Investigating anomalies
- Auditing fuel consumption
- Noticing unusual travel patterns.

TRAVEL COST Report

Description

Travel Cost Reports use the Travel Report and figures relating to vehicle type, fuel consumption and running costs to calculate costs of completing a job.

Approximate Travel Cost

This is an approximation and is only intended to give a guide to your travel cost.

Journey Info

Type	Renault Espace 2.2Dci
Fuel Type	Diesel
Petrol (pounds/litre)	£1.04
Distance Travelled	66.25 mi
Average Speed	26 mph
Highest Speed	53 mph

Economy Type(s) Cost

Cost @ 31.0 Miles Per Gallon	£10.10
------------------------------	--------

Typical Use

- Billing customers accurately and ensuring profit margins are maintained
- Determining the relative value of your customers
- Analysing the impact on costs of changing vehicle, wages or fuel consumption
- Analysing driver efficiency based on speed routes.

ADDRESS TRAVEL Report

Description

The Address Travel Report is an enhanced version of the standard Travel Report. In this variant, stop locations are compared against the postcode database to provide more detailed addresses.

- Auditing time on site
- Highlighting anomalies.

TIME SHEET Report

Description

The Time Sheet Reports are the most frequently used reports. They intelligently collate data collected automatically into a timesheet report detailing working hours, total travel time, distances and so on. With the privacy option fitted to vehicles, it also reports private mileage.

Over speed	Tues 19/02/08 06:44:21	On M4, 0.76 mi NW of Emmbrook, Berkshire
Over speed	Tues 19/02/08 06:46:01	On M4, 1.31 mi SW of Shurlock Row, Berkshire
Over speed	Tues 19/02/08 06:49:53	On M4, 0.81 mi N of Paley Street, Berkshire

Day's number of alerts: 13

Total number of alerts: 20

Typical Use

- Out of hours usage
- Audit trail for alert reporting (for example proving that a driver has been emailed relating to overspeed).

DUTY OF CARE Report

Description

This report allows the user to enter business rules relating to guidelines on use of company vehicles. It then automatically filters data over the period of the selected week and highlights infringements to the company driver policy.

Click on link to run Travel Report for this vehicle for a specified period.

Typical Use

- Validating timesheets
- Auditing overtime claims
- Measuring call rate per day
- Complying with working hours guidelines.

FLEET DISTANCE Summary

Description

The Fleet Distance Summary provides fleet managers with a snapshot view of weekly mileages by vehicle. If the vehicles are equipped with a privacy button option, the report differentiates private and business mileage.

TRACKER Vehicle Asset Management System

Fleet Distance Summary

Fleet Information	ACME Sales
Group	North
One Week From	Tues 01/01/08
Shift Pattern	00:00:00 - 00:00:00

Vehicle	Total Distance	Total Private	Daily Average	
			Distance Travelled	Private
Region 1	19.38 mi	16.25 mi	6.25 mi	5.00 mi
Region 2	26.88 mi	40.63 mi	26.88 mi	24.38 mi
Region 4	41.25 mi	0.00 mi	41.25 mi	0.00 mi
Region 7	0.00 mi	216.88 mi	0.00 mi	51.88 mi
Total	87.50 mi	273.75 mi	74.38 mi	81.25 mi

Simply click here to produce a Travel Report for more in-depth analysis.

Typical Use

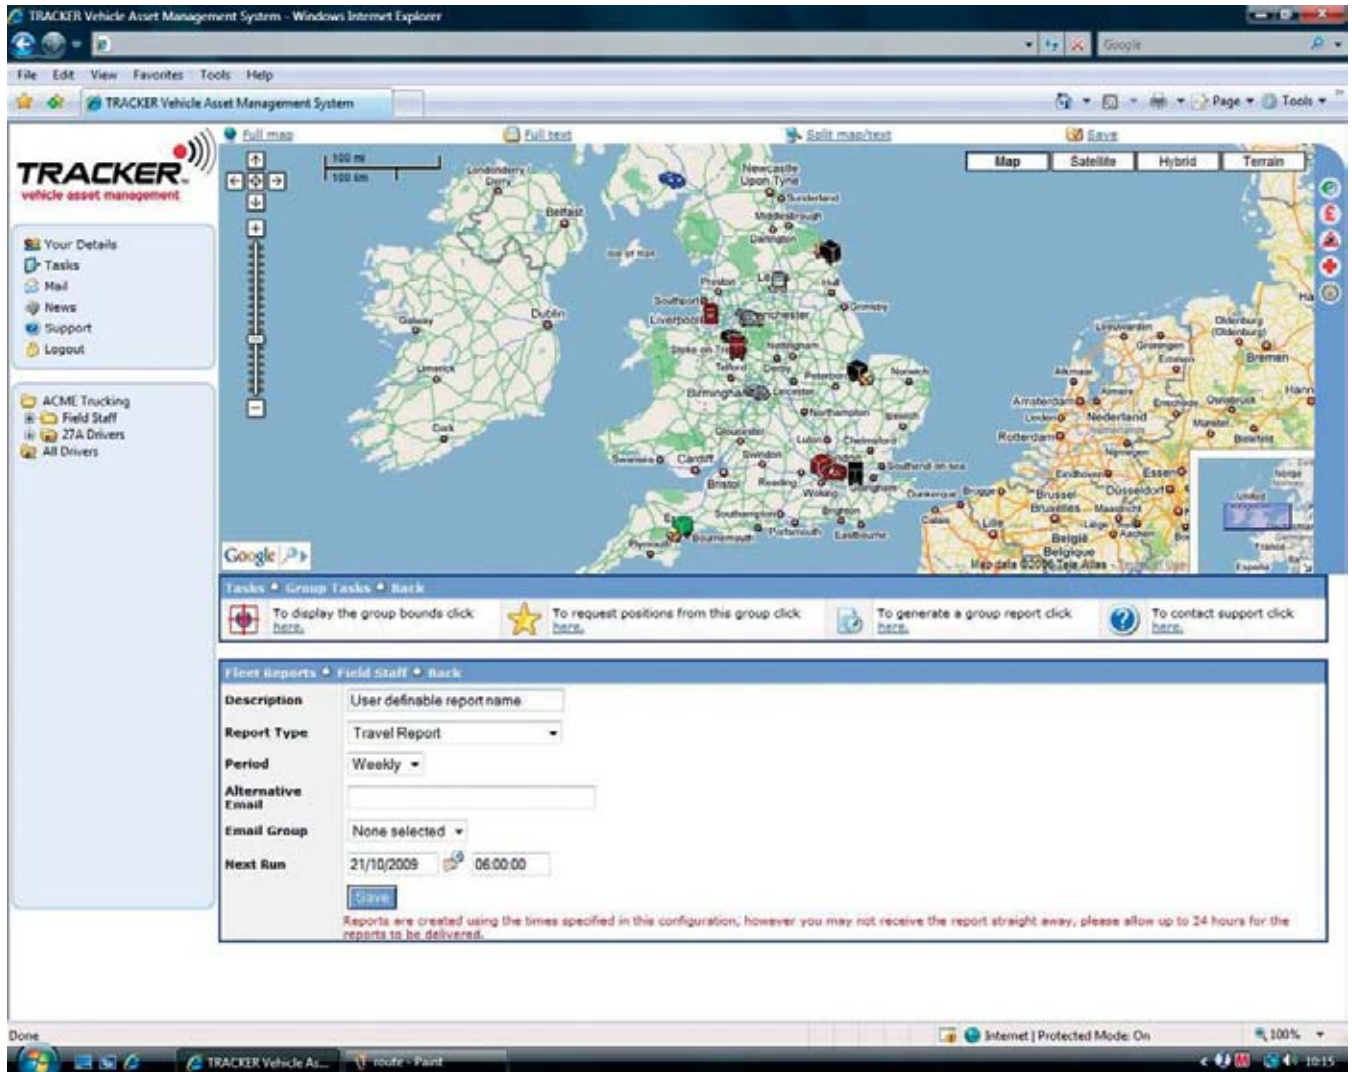

- Identifying high mileage vehicles
- Inter-departmental mileage re-charges.

EMAIL Reports

Description

For ease of use of reports that are required regularly, it is possible to set up and schedule these reports to be run automatically and sent to a preferred address, or a group of addresses on a daily, weekly or monthly basis.

Reports which can be set up for emailing are:

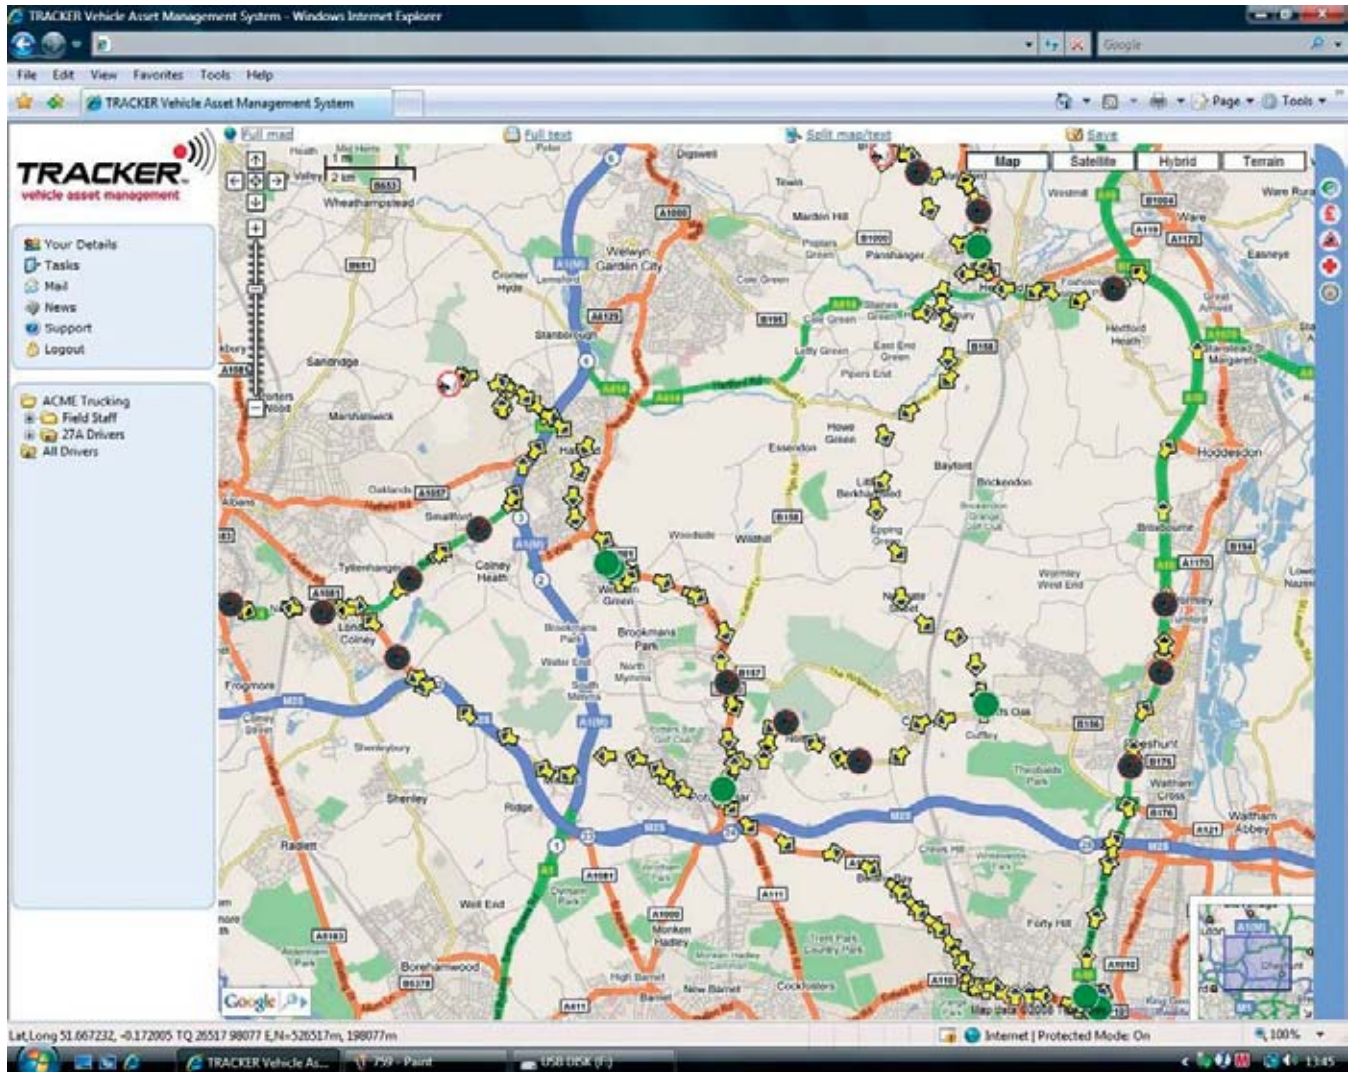

- Travel Report
- Stopped Report
- Address Travel Report
- Activity Report
- Activity Report with Mail
- Timesheet Report.
- Duty of Care
- Distance Summary
- Weekly Exceptions
- Congestion Report
- Fleet Summary

ROUTE REPLAY

Description

Individual vehicle journeys can be overlaid onto a map.

Typical Use

- Identifying routes taken
- Analysis of mileage discrepancies.

Total Journeys Out of Shift Pattern: 3					

Description

The Fleet Summary report is a weekly multi-level report ideally suited to organisations that operate from multiple sites or those with diverse competencies. At the top level it provides an overall view of the performance of the entire fleet, comparing different sections against one another. The second level examines the individual sections by comparing the performance of vehicles against one another, and the final level provides a daily vehicle analysis.

At each level of the report, areas of interest or concern can be examined by selecting an appropriate link to generate a new report. Such reports include non-compliance with pre-defined working hours, vehicles working at the weekend and vehicles speeding.

STANDARD SCREEN Layout

Description

The default screen layout provides users with the latest information on their fleets, both in a tabular format and overlaid on a map. Additionally it provides easy navigation to view history, run reports and administrate the system.

The screenshot shows the TRACKER Vehicle Asset Management System interface. The top navigation bar includes 'Full map', 'Full text', 'Split map/text', and 'Save'. The sidebar on the left contains navigation options: 'Your Details', 'Tasks', 'Mail', 'News', 'Support', 'Logout', and a list of users: 'ACME Trucking', 'Field Staff', '27A Drivers', and 'All Drivers'. The main area displays a satellite map with vehicle locations. Below the map, there are links for 'Tasks', 'Group Tasks', and 'Back'. A table of fleet information is shown below the map, with columns for 'Vehicle', 'Location', 'Speed', 'Reason', and 'Reported'. The table lists three vehicles: 01 David, 02 Kevin, and 06 Rod. The bottom status bar shows coordinates and system information.

Vehicle	Location	Speed	Reason	Reported
01 David	0.33 mi E of Glasgow, City of Glasgow G4 0BU	0 mph	Stopped Report	Tues 21/10/08 12:32:41
02 Kevin	On Schleswig Way, 0.83 mi SW of Earnshaw Bridge, Lancashire PR25 1TQ	36 mph	Timed Event	Tues 21/10/08 14:03:02
06 Rod	On Commercial Road, 0.72 mi W of Gloucester, Gloucestershire GL1 2EB	24 mph	Timed Event	Tues 21/10/08 14:05:49
